Price Report Column Headings

The items and specifications in this study are listed below. Descriptions for housing and utilities are abbreviated, since pricing is based on explicit procedural instructions and highly detailed specifications. Monthly costs for housing and energy are not communitywide averages, and should not be construed as such: they are specific to professional and executive households. • Establishment samples are selected to reflect a mid-management standard of living; minimum sample size depends on the population of the area for which data are collected. • To ensure uniformity, national brands are stipulated wherever possible. "Lowest price" is the average of the lowest prices found in all stores surveyed. • Weights are shown for the component indexes. • Weights are calculated by C2ER based on data extracted from the 2011 US Consumer Expenditure Survey, BLS.
