Subject: Land Preservation Board

Hi Josh, Thank you for informing me about my position on the Land Preservation Board expiring in Feb. I would respectfully like to submit my interest to stay on the Board. I have really enjoyed being a part of this organization.

I believe I am a great fit because of my long involvement in land conservation. Because I help to start the CB Land Trust, I have been involved for decades in conservation work in Gunnison County and bring with me a wealth of local historical knowledge about preservation that many people do not have. In looking at specific projects, I have references of the actual projects and background of them. In our most recent meeting, I was able to provide information about a project that was pertinent to the discussion because I was around years ago during that particular process. I worked with others on the CBLT Board to help the Gunnison Ranchland Conservation Legacy get their 501-c3.

One of the things I admire about the Gunnison County representatives is that you appoint one person from each end of the valley and I feel that is a good idea for your appointees to be able to equally represent the entire valley. I have also been involved with the 1% for Open Space since its inception and have good cross over knowledge when discussing projects.

I hope the Board of County Commissioners will consider retaining me on the Board. If I need to go to any meeting at this time please let me know by phoning me at 349-5729. Thank you!! Cheers Glo Cunningham
