Dear Ms. Mense,

I want to express my interest in serving on the Environmental Health Board. My interest stems from a career working in water quality assessment and wetlands work associated with the Clean Water Act.

I have a technical background in water, botany and soils, and have taught several biology classes at Western Colorado University over the years. Many years ago, I worked for the county as the Water Quality Technician operating the water lab. As a consultant I completed numerous water quality studies in the valley, and have completed dozens of wetland delineations in the valley. On occasion while completing wetland delineations, I assisted clients with location of their septic systems to meet setbacks under the ISDS regulations. However, it has been awhile and I will have to familiarize myself with the county's newer On-Site Wastewater Treatment System Regulations.

At this time, I continue to complete wetland delineations in the valley, but on a limited basis, and I also complete permitting work for a company in the Midwest. My schedule is fairly open, but I will out of the country from March 22-April and then in October.

I am hopeful that I can serve Gunnison County, and feel that I can make fair decisions based on the facts and other information presented. If you need anything else regarding my background and would prefer to call, please do not hesitate to contact me.

Thank you for your time.

Sincerely,
Lynn Cudlip
