Attachments: Request for tough shed June 2019 B.docx

Our original request a couple of years ago was to replace this metal shed with a sea container. This request was denied. We are now looking at portable wood building that might be more acceptable. Thanks for your help and guidance

OHIO CITY VOLUNTEER FIRE DEPARTMENT
136 County Road 771
Ohio City, CO 81237

Ohio city volunteer fire department is requesting permission from the Board of County Commissioners to replace our existing portable steel storage building approximately 10′ x 10′ in size. This existing metal building is approximately 30 years old and the mice problem is only getting worse with each year. The metal building is used to store extra bunker gear, grills for fundraisers, boom pads for trapping oil on our waterways and various emergency services equipment not used on a regular basis. There are several buildings to choose from for its replacement, including the tough shed company north of Gunnison. It is our plan that the new building have a single window, and a large walk door with threshold to allow for better mouse proofing. Electrical should not be necessary as the existing building has no electrical and we normally go in this building during the daytime hours. We could use battery-operated lighting if there is a need in the future to have more than a flashlight to find what we need. The new portable building should be approximately 10′ x 20′ to accommodate our needs for the next 20 years. It is planned that we will have a red roof and stained wood siding that closely match our existing building.

Thank you,

Hal Hearne
Fire Chief, Ohio City Volunteer Fire Department.

Att: Pictures of existing shed and an example of a potential replacement.
